Jl. Pematang Siantar KM2, Sibolahotang SAS, Balige, Toba, Sumatera Utara

Software Engineering student and aspiring Full-Stack Developer with hands-on experience in developing web and mobile applications using Laravel, Flutter, and Node.js. Skilled in analytical problem-solving and full-cycle system development. A proactive team player and independent contributor dedicated to delivering efficient, high-quality software solutions.

Education Level

Institut Teknologi Del - Sitoluama, Laguboti, Toba, Sumatera Utara

Aug 2023 - Sep 2027 (Expected)

Diploma in Software Technology Engineering, 3.72/4.00

Work Experiences

Human Resource Information System (HRIS) with Face Recognition and Location-Based Service (LBS) at Labersa Hotel and Convention Center - Toba, Sumatera Utara

Feb 2026 - Present

Software Engineer (Project-Based)

- Designed and developed a comprehensive Human Resource Information System (HRIS) architecture for Labersa Hotel, utilizing Next.js for the frontend and Golang for the backend to modernize HR management and streamline employee attendance tracking.
- Integrated biometrics through Face Recognition technology utilizing computer vision libraries (OpenCV/dlib) to build a secure attendance authentication system, significantly minimizing time fraud and proxy attendance risks.
- Implemented a Location-Based Service (LBS) feature leveraging the Geofencing API to validate employee clock-in locations in real-time, while designing an optimized, structured database schema for secure data storage.

Mobile-Based Computer Based Test (CBT) System at SMP Swasta Budhi Dharma Balige - Toba, Sumatera Utara

Feb 2025 - Jun 2025

Backend & Mobile Engineer (Project-Based)

- Designed and built a robust backend architecture along with RESTful APIs using Golang to fully support the operations and data traffic of the mobile-based CBT application.
- Optimized server performance and database queries to handle high concurrency, ensuring smooth data retrieval for question banks and seamless submission of answers by hundreds of concurrent student users.
- Developed the mobile client application using Flutter, integrating local caching mechanisms and an offline-first architecture to safeguard the integrity of students' exam answers against network disruptions.

Web-Based School Information System at SMP Negeri 1 Silaen - Toba, Sumatera Utara

Feb 2024 - Jun 2024

Full-Stack Web Developer (Project-Based)

- Designed and developed a centralized, web-based Academic Information System platform for SMP Negeri 1 Silaen utilizing the Laravel framework to digitalize school data management.
- Implemented a Full-Stack architecture embedded with a secure Multi-User Authentication feature to provide distinct, role-based interface access for administrators, teachers, and students.
- Designed an optimized relational database schema using MySQL to effectively manage structured school transactional data, including student profiles, academic grading, and official announcements.

Organisational Experience

Google Cloud Arcade 2025 - Jakarta, Indonesia

Jul 2025 - Sep 2025

Facilitator

- Guided and facilitated over 75 participants in effectively completing Google Cloud Platform (GCP) technical modules (labs) on the Cloud Skills Boost platform.
- Responsible for monitoring and tracking participants' technical badge completion progress to ensure all team members achieved program milestones on time.
- Fostered an active learning community by organizing discussion sessions, assisting with troubleshooting technical issues within the labs, and sharing best practices regarding cloud architecture.
- Acted as the primary communication bridge between the central Google Cloud Arcade committee and the participants to ensure smooth and seamless delivery of program information.

Google Student Ambassador 2025 - Jakarta, Indonesia

Sep 2025 - Jan 2026

Student Ambassador

- Acted as an official Google representative on campus to bridge students with career opportunities, programs, and the latest technologies from Google.
- Planned, organized, and executed various tactical events such as workshops, seminars, and tech competitions that successfully attracted hundreds of students.
- Facilitated training and education programs on leveraging Google products and developer tools to enhance the digital readiness and technical skills of the student community.
- Built and managed an inclusive local community to foster collaboration, knowledge sharing, and expand professional networks among multidisciplinary students.

Department of Communication and Information, Student Executive Board of Institut Teknologi Del - Toba

Dec 2024 - Present

Publication Division Member

- Fully responsible for managing and optimizing BEM IT Del's official social media channels as the primary, interactive communication medium for the entire academic community.
- Designed and produced creative, informative, and adaptive digital publication content to disseminate BEM work programs, campus issues, and student achievements.
- Developed a systematic publication timeline strategy (content scheduling) to ensure the periodic, accurate, and timely delivery of important information.

Skills, Achievements & Other Experience

- **Achievements** 🏆 (2025): Top 20 Finalist at FertInnovation 2025 by Pupuk Indonesia
- **Soft Skills** 🌟 (2025): Google Student Ambassador
- **Projects** (2025): Overseas Social Innovation Project
- **Achievements** 🏆 (2025): Google Cloud Arcade Facilitator
- **Achievements** 🏆 (2024): National Final Huawei ICT Competition 2024
